6. CONCLUSION	19

All children have the absolute right to a healthy life

Children must thrive so they can develop to their full potential and become useful members of society when adults.

All of South African children must at all times have access to the best possible medical care. A sick child must be able to see a top class doctor or a specialist when needed, receive their vaccinations, receive medical treatment and surgeries if they are sick without exception.

The right to a healthy life includes food security and clean drinking water.

Pediatric care Africa delivers on our promise we made to children to give them a chance to live and flourish.

Pediatric Care Africa and their partner in The Netherlands Stichting Support Pediatric Care Africa consist of a team of like minded individuals with the same goal: “Changing children's lives for the better and give them access to quality health care.”.

Our focus is making a difference to children in need.
No child should die or suffer simply because his parents are poor...!

1. Board report

Pediatric care Africa Board of Trustees:

We would like to share with you our annual report for the year 2021.

In 2021 Pediatric Care Africa had planned 70 to 100 surgeries with the expectation to provide surgery for 70 to 100 children and planned to help at least 450+ children with medical treatment. Furthermore we planned to conduct 6 large scale medical outreaches to informal settlements and care centers and to continue to supply age appropriate nutritional food parcels to 350+ children on a monthly basis.

Unfortunately, the worldwide outbreak of COVID-19 reached South Africa in March of 2020. The government enforced an immediate lockdown effecting the entire country. Even though the lockdown was lifted in September 2021 the economy of South Africa did not bounce back. On the contrary the severely weakened economy and the fact that the country faces very frequent rolling electricity black outs resulted in many people still losing their jobs. Almost 50% of the South African population is jobless and there is no indication that this situation will improve. On the contrary all indications are that the economy will continue to worsen.

Since Covid-19 lockdown the demand of our services has increased by over 600 % and at the same time our donations from the public and businesses has decreased by 70%. We anticipate that the demand for our services will increase by as much as 10% per month.

This forced loss of income caused hunger among many families and the consequences for families with children and elderly family members were devastating.

The Covid-19 pandemic was recognized and perceived by PCA as a national disaster and we responded to it as indicated and required in our Constitution. As an essential organization we were able to continue operating, but had to change our focus from surgeries to feeding hundreds of families totaling about 2500 persons without access to food. Over the period January 2021 to December 2021 we handed out and distributed 147 tons of food which is the equivalent of 2 000 000 (two million) meals to families in distress.

In the meantime we continued, whenever possible to provide medical assistance to less fortunate children in our local communities. In collaboration with local pediatricians and general practitioners we were able to help our little patients with medical conditions big or small. Unfortunately elective surgeries were put on hold as the Government only allowed emergency surgeries to take place. We were be able to conduct only 2 medical outreaches to isolated areas due to the Covid-19 restrictions.

Thanks to donors from the Netherlands, Pediatric Care Africa purchased a Land Cruiser and a trailer for use in disasters, food deliveries and getting to far off places and reach people in distress where a heavy duty 4x4 is required. The Lowveld Nomads sponsored the branding of the vehicle and some medical equipment, it is now very recognizable and beautifully branded and ready to tackle 2022 and beyond.

In conclusion the situation in South Africa is on the brink of a total disaster; with massive loss of jobs, companies leaving South Africa because of a lack of electricity supply, the near collapse of the government healthy systems and the massive uncontrolled state capture in the government departments. And on top of all these difficulties we now also face natural disasters such as regular floods and droughts due to climate change.

1.1 Activities 2021

The results we as Pediatric care Africa achieved in 2021 were nevertheless great, which we would proudly share with you:

- We organized food distribution outreaches twice a month to residents of informal settlements and persons in our communities and handed out food parcels to individuals and families every 2 weeks. Over the period January 2021 – December 2021 we handed out 147 tons of food which is the equivalent to 2 million meals.
- 4 Children received life changing surgery.
- 2 Children was admitted to hospital to receive urgent medical treatment.
- 51 Children were referred to Medical specialists receiving the best private medical care possible.
- 41 Children visited a private general practitioner and got the help and medicines required and prescribed.
- 2 medical outreaches were held reaching over 300+ patients (children and adults) bringing the total of persons receiving medical treatment to approximately 600 persons for 2021.

1.1.1 1000 surgeries for 1000 children #helpmyop

In 2019 we launched the “#helpmyop” campaign.

In South Africa, children often times do not receive the surgeries they need and require due to a number of reasons, such as lack of money and transport to go to a Government Hospital that may have the facilities and staff to conduct a required surgery. Such a “referral” Hospital may be a long distance away and parents have no accommodation to stay at once their child is admitted to a Hospital, or taxi money to get there. Very frequently children are referred to far away Hospitals only for them to discover and be told that there is no electricity, or a surgeon is not available or the equipment is faulty or the surgical list is so long that surgery is planned for an unknown future date, which may or may not happen. Sadly, many children simply never receive the treatment they deserve or at a level of care they deserve, if parents do not have a medical aid or money.

Every single child deserves access to appropriate surgical and medical treatment.

We are fully committed to these children and try to arrange surgeries for them through our network of private specialists and Hospitals wherever possible.

Our aim is to offer 1000 surgeries to 1000 vulnerable children over a period of 15 years, of which 800 surgeries is intended for children in South Africa and 200 children in neighboring Countries. For this campaign we ask donors to pledge a financial or skills donation to our program to enable us to give babies and children ages 0-18 years access to life changing pediatric surgery.

We receive awesome assistance from both Busamed Lowveld Private Hospital and Kiaat Private Hospital with our #helpmyop campaign.

Unfortunately due to the Covid-19 pandemic a lot of our planned surgeries were put on hold. However we managed to organize the following surgeries during lockdown.

- Bilateral Myringotomy
- Boy with multiple cavities in Septum required specialist ENT treatment
- A young girl received Botox in both legs to stretch her shortened tendons and thereafter received extensive physiotherapy for 6 months.
- Boy who was unable to speak required Ankyloglossia corrective treatment

1.1.2 Doctors visits

Children have the right to the best possible healthcare. We aim to improve the health situation of vulnerable children in communities in South Africa.

We provide medical assistance to children when they are sick who's parents are poor, by taking them to Private General practitioners, Medical specialists or clinics daily. By ensuring that a sick child is seen by a private doctor or specialist and receiving the treatment and medication they need, is one of our main daily activities as we assist around 400 children per year to see a private Doctor and receive treatment.

If required we will collect the sick child and his/her parents/guardian and take them to their medical appointments, and should the child require any medicines, lab tests or any further form of investigation such as X rays it will also be supplied free of charge by us to the patient and his parents/guardian. Follow up check ups are arranged if required.

Children that are identified as in need of OT/Physiotherapy such as children with Cerebral Palsy for example, are assisted by qualified registered therapists. The therapy received are case specific.

Children receive medical treatment, medication & care from private medical practitioners and specialists varying from ENT 's and Urologists to Pediatricians and more.

1.1.3 #baby care pack feeding program

Every child has the right to a healthy life. This right to a healthy life also includes food security and clean drinking water.

Malnutrition is a huge problem among children living in poverty stricken communities and areas. The relationship between nutrition, health and learning is undeniably strong: nutrition is one of the three major factors that impact a child's development. Today many mothers and their children live in very severe poverty. With this in mind we started a monthly food parcel campaign #babycarepack in 2019. We look after an average of 350 children in our local communities every month by providing the mothers with baby food and food for their children and themselves, as well as baby care products such as diapers, OTC medicines and everything else that babies and small children need for a healthy start to their lives.

The Covid-19 pandemic caused many people to lose their jobs and therefor many families simply no longer have money to buy food for their families. Pediatric care Africa views Covid 19 as a disaster and we have organized a feeding program during the national lockdown period whereby we handed out hundreds of thousands of meals and from January 2021 until December 2021 we distributed 147 tons of food to people with food insecurity.

1.1.4 Medical outreach

We regularly organize medical outreach programs in our local communities to improve the health situation of the children living there.

The children are examined, diagnosed and treated by a team of highly professional and skilled group of volunteers consisting of Doctors, Physiotherapists, Occupational therapists, Dietitians, Audiologist, Speech therapists and other volunteers. Malnutrition, cerebral palsy and growth disorders are a few examples of diagnosis made in children attending a medical outreach.

After the children have been examined and treated and if necessary are referred to a specialist or hospital for further medical treatment, we ensure that each and every child receives his/her prescribed medications or special diets.

In winter months, flu vaccination programs are also organized as we believe prevention is better than cure.

Due to Covid-19 restrictions that lasted till September 2021 we could only organize 2 medical outreaches to the residents of Magalela, an informal settlement on route to Hazyview, and Brondal, an informal settlement just outside of Nelspruit.

A total of approximately 4000 people live in the above mentioned settlements.

Patients were seen and attended to by a highly professional group of volunteers consisting of Doctors, Physiotherapists, Occupational therapists, Dietitians, Audiologist, Speech therapists and nursing sisters.

1.1.5 Disaster relief

In the event of humanitarian disasters both natural or manmade – we respond immediately and offer our help to communities not only in South Africa but to all our Neighboring Countries as well.

Covid-19 pandemic

The worldwide outbreak of COVID-19 reached South Africa in March of 2020. The government enforced an immediate lockdown effecting the entire country. Even though the lockdown was lifted in September 2021 the economy of South Africa did not bounce back. On the contrary the severely weakened economy and the fact that the country faces very frequent rolling electricity black outs resulted in many people still losing their jobs. Almost 50% of the South African population is jobless and there is no indication that this situation will improve. On the contrary all indications are that the economy will continue to worsen.

Since Covid-19 lockdown the demand of our services has increased by over 600 % and at the same time our donations from the public and businesses has decreased by 70%. We anticipate that the demand for our services will increase by as much as 10% per month.

This forced loss of income caused hunger among many families and the consequences for families with children and elderly family members were devastating.

The Covid-19 pandemic was recognized and perceived by PCA as a national disaster and we responded to it as indicated and required in our Constitution. In 2021 we continued to hand out food parcels to persons without access to food. Over the period January 2021 to December 2021, we continued to hand out and distribute 147 tons of food which is the equivalent of 2 000 000 (two million) meals to families in distress.

Considering we are a medical NGO and not equipped to transport, package and distribute the vast amount of food required to help starving people, we are proud that we could continue to meet this dire need.

The severity and extend of Covid-19 caught most people by surprise and our mandate stipulates that in the event of national disaster, we no longer only assist children but must assist adults as well.

With the help of many donors as GB2C, HCI Foundation, IDC, Spar DC Nelspruit, Crossing Shopping Centre Nelspruit and many more local companies we were able to continue to deliver food relief parcels to communities in need. The food parcels consisted of maize meal, rice, coffee, tinned food, porridge, vegetables eggs, fruit etc.

Thanks to donors from the Netherlands, Pediatric Care Africa purchased a Land Cruiser and a trailer for use in disasters, food deliveries and getting to far off places and reach people in distress where a heavy duty 4x4 is required. The Lowveld Nomads sponsored the branding of the vehicle and some medical equipment and it is now very recognizable and beautifully branded and ready to tackle 2022 and beyond.

2. Goals for 2022

Our goals for the coming year of 2022 are as follows:

- Arrange 20 surgeries for children in need ranging from tonsillectomy to grommets. Due to dramatic decrease in our funds the number of children that can or will receive surgery is unknown, but we are hoping to do at least 20 surgeries.
- Ongoing supply of appropriate nutritional food parcels to 350+ children (babies and toddlers) on a monthly basis.
- 600+ children taken to visit private doctors, specialists and all therapies.
- To conduct 4 large scale medical outreaches to informal settlements and care centers to reach over 2000+ under privileged patients. They will receive medical examinations, medication, laboratory testing, audiology etc.

REACHING OUR GOALS:

Pediatric Care Africa means to achieve our goals through the following fundraising events:

- Golf Days, Sports Days, Women's Events, Auctions.
- "Ride for a Child" Campaign whereby Dr. Andre and a team ride their motorbikes for a distance of 7000km around South Africa in order to raise funds for children.
- "One man – One Tractor" 2500km tractor ride; Dr Andre rides 2500km on a tractor through 5 provinces to raise funds for medical treatment and surgeries for children, raise awareness of child abuse in South Africa and show support to 911 Riders and their fight against Farm Attacks and Murders.
- Ongoing goods donation support from local businesses.
- Monthly food donations from local communities, schools, Companies and NGO's.
- Partnerships with other foundations as well as established business to offer financial support to Pediatric care Africa.
- Support from International foundations/funds that have the same mission - to help children to have hope for the future.

3.2. Our board

Board Members Pediatric Care Africa –

Chairman/Founder : Dr J. André Hattingh MD. Ph.D. DTM&H (Ret.)

Vice Chairman: Ben van der Merwe ~ BSc

Treasurer: Joyce Cromptvoets ~mr. (Netherlands)

Secretary: Surika van der Merwe ~ B.Iuris. LLB

Board member: Adele Marais ~ RD Registered Dietician

Board member: L.J.A Cromptvoets ~ mr. (Netherlands)

We employ one full time corporate fundraiser that assist us with raising funds and awareness for the cause and also have general staff that assist us with daily duties; packing of food parcels, loading and offloading of parcels and donations, etc. Furthermore we have over more than 200 volunteers to assist us with everything from medical outreaches, food deliveries to writing grant proposals.

3.3 Our partner in The Netherlands

Stichting Support Pediatric Care Africa

In January 2021 the Dutch charity foundation Stichting Support Pediatric Care Africa was founded. The Dutch foundation was established to support Pediatric care Africa in South Africa. Stichting Support Pediatric care Africa's main purpose is to draw attention in The Netherlands to the work Pediatric care Africa does in South Africa and raise funds to ensure that Pediatric care Africa can continue to help underprivileged children in need.

5. Social media

Please have a look at our website - www.pediatriccareafrika.org and www.stichtingsupportpediatriccareafrika.nl You will find all our latest stories as well as further information regarding news articles, radio appearances etc.

We are also very active on Social Media, please follow the link for our Facebook Page - <https://www.facebook.com/pediatriccareafrika>

You can also have a look at our Instagram page, please follow this link <https://www.instagram.com/africapediatriccare/>

6. Conclusion

We sincerely thank you for taking time to look at our Annual Report 2021 and for your interest in assisting the beautiful children of South Africa & Africa.

Without the generosity of donors we are but a website. We need supporters and donors to fuel our cause and to help us achieve our dream - changing the lives of children in need.

Please help us to make these children's dreams come true - you can be someone's hero!

**Children are our greatest treasure.
They are our future.
- Nelson Mandela**
